

COCO A+B

PRODUCT APPLICATION

5 ML

1 LITER WATER

PRODUCT COMBINATION

** HY-PRO **COCO A+B** can be used with all types of substrates, soils and fertilizers

COCO ROOTS

COCO BLOOM

SPRAY MIX

GENERATOR

COCO A+B

HY-PRO GROW & BLOOM NUTRITION FOR COCOPEAT PLANTS

The nutrients needed to promote growth and flowering are not naturally presented in your cocopeat substrate. When using cocopeat as a growing substrate, it is necessary to use a liquid fertilizer in order to supply the plant with the required amount of nutrients. Thanks to the spongy structure, coco peat is very good at holding moisture and nutrients in its pores and releasing them to the plant roots as and when they need it. HY-PRO Coco A+B contains all necessary nutritional minerals and trace elements for optimizing both the growth and flowering phase of plants.

HY-PRO Coco A+B is a high-quality 2-component fertilizer containing all the necessary minerals and trace elements for a healthy plant life and a successful harvest. HY-PRO Grow & Bloom nutrition has proven itself over the past 30 years and our simple formula and proven track record speaks for itself.

HY-PRO COCO A+B IS A POWERFUL FERTILIZER FOR COCOPEAT SUBSTRATES

** ESSENTIAL MACRONUTRIENTS FOR ALL HEALTHY PLANTS

HY-PRO COCO A+B Grow&Bloom nutrition replenishes and maintains essential nutrient levels

** A BLEND OF MICRONUTRIENTS FOR PRODUCTIVE PLANTS
