

# SPRAYMIX

## PRODUCT APPLICATION

5 ML

1 LITER WATER

## PRODUCT COMBINATION

\*\* HY-PRO **SPRAYMIX** can be used with all types of substrates, soils and fertilizers

HYDRO

TERRA

COCO

ADDITIVES

# SPRAYMIX

## PLANT NUTRITION NOT FOCUSED ON THE ROOT INTERACTION

Plants and crops are not always surrounded by adequate humidity. Especially plants that come from warmer climate, also use their leaves to take up vitamins and nutrients. HY-PRO Spraymix has the same effect as a wonderfully refreshing rain shower on a thirsty and dried out plant. This foliar nutrition is quickly absorbed by the leaves and contains more than 25 different minerals and trace elements. The leaves are given a boost, creating healthy, deep green leaves, with a harder outer layer, making the foliage less susceptible to fungi such as mildew.

HY-PRO Spraymix helps the plant to build up resistance to negative external influences, drought and too much direct sunlight. HY-PRO Spraymix in concentrated form is available in 5 standard sizes. HY-PRO Spraymix is also sold as a ready-to-use 1 liter spray bottle.

## HY-PRO SPRAYMIX CAN BE USED WITH ALL SOIL AND HYDROPONIC SUBSTRATES

### \*\* IMPROVES RESISTANCE TO DISEASE

**HY-PRO Spraymix** increase the plants resistance against mildew, insects and heat burn

### \*\* DELIVERS NEEDED NUTRIENTS

**HY-PRO Spraymix** contains a unique blend of foliar nutrients easily absorbed by the plant

### \*\* OPTIMIZES REGULAR HUMIDITY FLUX

**HY-PRO Spraymix** optimizes the humidity flux with essential compounds and trace elements
