## HY-PRO BLOOM BOOSTER FOR PLANTS GROWING IN SOIL

The HY-PRO Flowering Booster Epic Bloom is a highly concentrated and powerful flowering enhancer that delivers explosive and proven results. This carefully crafted flowering booster contains the right quantity of micronutrients to boost your plants ability to produce of sugars. Offering an macro-nutrient formula with increased levels of phosphorus and potassium – the two nutrients that best support flowering – combined with an effective cocktail which include trace minerals, amino acids and other organic stimulants. Energy for growth, flowering and producing higher yields.

HY-PRO Flowering booster – Epic Bloom gives your soil plants just what they need when they need it. HY-PRO flowering boosters can also be used as a foliar spray; the plant will absorb the nutrients directly through the leaves helping to prevent weakness, deficiencies and disease.
